

## MM™ Series Miniature Captive Screws Designer's Guide

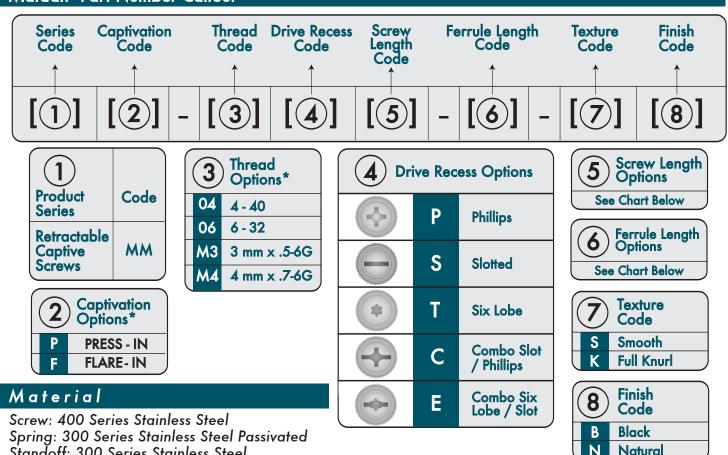

### **MM™ Series Miniature Captive Fasteners**

### Features & Benefits

- Standard Stainless Steel material provides superior strength and corrosion resistance over competitive products made from carbon steel
- Small footprint for fastening in limited-space applications
- Tool or finger actuation
- Multiple drives, thread sizes, textures and finishes available
- Custom lengths, materials and sizes available upon request

### Matdan® Part Number Callout

<sup>\*</sup>Also available in Floating and PC Board styles as well as custom lengths, materials and sizes (up to 1/4-20 and M6). Contact factory for details.

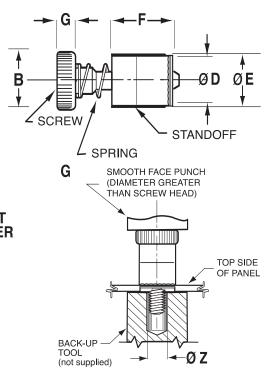

### Press in

### Installation Instructions

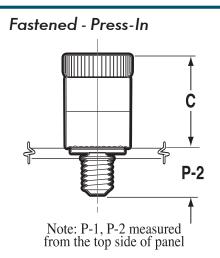

- Prepare installation hole for correct thread size \* (leave the hole edges sharp - DO NOT CHAMFER)
- Press-in captive screw as shown. Assure parallel surfaces on the punch and back up tool.

\*Recommended minimum distance from edge of panel to center line of hole is 1.5 x ØX for press-in version.

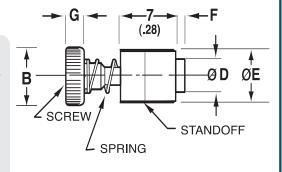

# Walue represents float in unfastened position

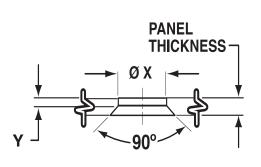

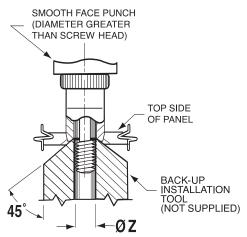

### Flare In

### Installation Instructions

- Prepare installation hole for correct thread size\*
- 2. Use minimal force to flare standoff. Parallel surface needed on the punch and back-up tool.

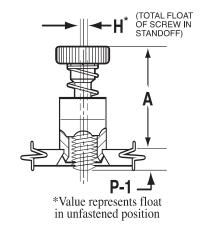

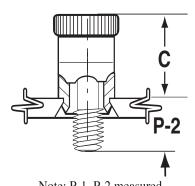

\*Flaring tool required for proper installation. Available upon request.

### Unfastened - Flare-In

### Fastened - Flare-In

Note: P-1, P-2 measured from the top side of panel
