**GLOVES- VESTS- BOOTS- COVERALLS- RAINWEAR**

## Introduction to Seattle Glove

For the past 20 years, Seattle Glove Inc., has been building our brand of general safety products, servicing and preventing injuries to industries/manufacturers in North America. From individuals pruning their lawn to construction workers, line assemblers, food processors, sheet metal fabricators, automotive workers, oil and gas industry and welding technicians, our goal is to find the right safety product for your specific application. As we continue to grow and expand, our basic principles are still in practice today:

- Value:** *Conduct our business with integrity.* We consistently explore options to cut our operational costs while delivering to our customers – a total cost savings by offering a wide range of quality safety products.
- Convenience:** Through the proprietary one-stop shop model, we offer distributors convenience, cost-savings, efficiency and quality assurance.
- Service:** We are devoted to become a leader in gloves, protective garments, personal protection and safety equipment; our talented workforce is committed to superior service and knowledge, supported by exceptional resources, tools, and product knowledge.

As we continue to grow and expand our product line, we have added safety products that are more comfortable while minimizing risk of injuries. We are proud of our product expansion but also see a tremendous opportunity for future growth. We are a full line glove company (leather, cotton, PVC, latex, nitrile and vinyl disposable, Neoprene, cut protection and anti-fatigue gloves). With our expanding selection of protective garments (Tyvek, Fire Retardant Coveralls, Micro-porous, SMS and polypropylene), safety products (PVC boots, rubber boots, safety vests, rainwear and caution & danger tapes), we strive in becoming a “One-Stop” shop for our distributors.

We sell our product to safety equipment distributors and ship through two distribution centers (Mukilteo, Washington and Macedonia, Ohio). This enables us to service our customers by expediting deliveries.

Seattle Glove, Inc. is proud of the progress we have made in integrating new products that minimize injuries while enhancing productivity to a wide range of industries/manufacturers. We will continue our dedication in research and product development ensuring a safer environment for industries/manufacturer workers.

At Seattle Glove Inc., we take pride in our service and knowledge. Our staff will help you ascertain which of our broad range of products will best suit your needs.

Sincerely,

Thieu H. Tran  
President

SMS Coverall, Attached Hood and Boots.

Sizes: M-4XL

**E8417C**

SMS Coverall, Elastic Wrists and Ankles.

Sizes: M-4XL

**SMS8417B**

Blue SMS Coverall, Elastic Wrists and Ankles.

Sizes: S-5XL

**PP25CO**

White Polypropylene Coverall, Collar and

Zipper Front, Elastic Wrists.

Sizes: L-4XL

**PP25CB**

Light Weight, White Polypropylene Coverall,

Elastic Wrists, Zipper, Attached Hood and Boots.

Sizes: L-5XL

Different jobs require various levels of protective clothing and Seattle Glove is proud to offer a wide variety of DuPont™ products to address those needs. We are one of a select few wholesalers for DuPont™, which allows us to provide competitive pricing to our distributors.

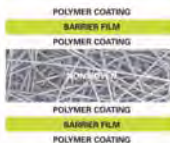

# CHOOSING A GARMENT

Before searching for an appropriate chemical protective garment, a detailed assessment of the nature of the hazard and the working environment is needed. There are different factors such as concentration, temperature, pressure and the work environment that should be matched to the garment's fabric, design and seam construction.

## Fabric

### DuPont™ Tychem®

Chemical barrier fabrics specifically engineered for protection over a range of hazards.

### DuPont™ Tyvek®

Made only by DuPont, it offers superior protection and durability. Tyvek® is 100% high-density polyethylene fibers entangled into a protective material with no fillers or thin films to wear away.

### Microporous Films

Bi-laminate with a thin microporous film layer on a spunbonded polypropylene nonwoven, these fabrics offer limited durability-barrier protection is lost when the film layer is abraded.

### SMS (Spunbonded-Meltblown-Spunbonded)

SMS fabrics rely on the meltblown polypropylene layer in the middle of the open tri-laminate polypropylene structure to act as the main filter for particles-limited durability and barrier performance.

## Seam Construction

### Serged or Sewn\*

A seam produced when multiple threads are interlocked around the raw edges of two pieces of material for a strong, stress-resistant seam.

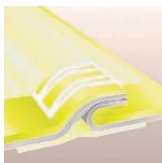

### Bound\*

Tightly sewn with a reinforced outer binding to increase seam strength and barrier. For potential misting exposure of non-hazardous liquids or particle penetration through the seam.

### Taped

Both sewn and taped to provide strong chemical resistance against heavy liquid splashes and tough seam stress. A sewn seam is covered with a strip of compatible material by heat sealing.

### Double Taped

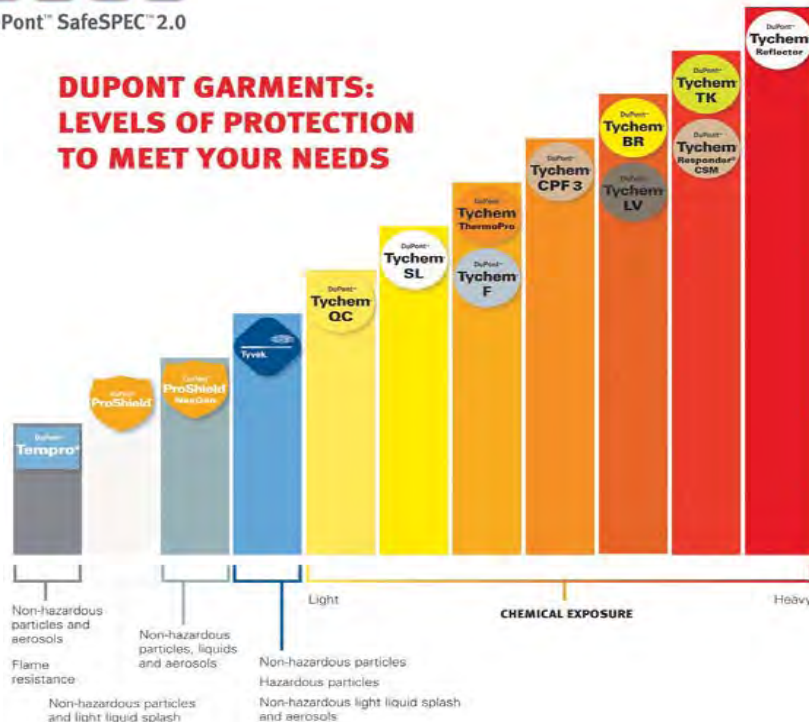

Sewn, then taped on the inside and outside of the seam for a very strong chemical- and stress resistant seam.

\*Serged and/or bound seams are degraded by some hazardous liquid chemicals, such as strong acids, and should not be worn when these chemicals are present.

DuPont™ SafeSPEC™ 2.0

## DUPONT GARMENTS: LEVELS OF PROTECTION TO MEET YOUR NEEDS

Sizes: L-7XL

**QC120SYL**

**QC127SYL**

**NG127SWH**

**TYCHEM**

**QC120SYL**

Tychem, QC Coverall, Zipper Front, Storm Flap.

Sizes: M-5XL

**QC127SYL**

Tychem QC Coverall, Yellow, Attached Hood.

Elastic Wrists and Ankles.

Sizes: L-6XL

**QC500BYL**

Tychem QC 18" Sleeve, 200/Case.

**QC500BYL**

**NEXGEN**

**NG127SWH**

NexGen Coverall, Hood, Elastic Wrists and Ankles, 25/Case.

Sizes: M-3XL

## GLOVE PATTERNS

**GUNN-** Extends glove life keeping seams out of work area; available in continuous and wing thumb; made in leather palm and all leather.

**CLUTE-** Seams on back of glove reduce splitting' holds work area more tightly to palm; one piece palm; made in cotton and leather palm styles.

**REVERSIBLE-** Gunn pattern with thumb out of side; glove can be worn on either hand.

## CUFF STYLES

**KNIT WRIST-** Provides comfort and a snug fit.

**BAND TOP-** For easy removal and good circulation.

**SAFETY CUFF-** Side slit enables wearer to throw off the glove quickly.

**GAUNTLET-** Easy removal and hold tucked sleeve in glove.

**SLIP ON-** Easy removal.

## LEATHER PALM GLOVE FEATURES

**STRAIGHT THUMB-** Continuous full leather thumb; seam around the thumb.

**WING THUMB-** Thumb out to side; welts added to the seams for strength.

**KEYSTONE-** Thumb set-in as a separated piece, positioned naturally for maximum comfort; thumb seam is reinforced with extra stitching.

## LEATHER TYPES

**GRAIN-** Smooth surface and soft pliable finish giving adequate finger dexterity.

**SIDE SPLIT-** Contains few scars, veins and blemishes; more uniform thickness and flexibility.

**SHOULDER SPLIT-** Coarse texture leathers; firmer with less uniformity and flexibility than side split.

European Directives 89/686/EEC Conception of Personal Protective Equipment (PPE)

PPE are classified in three categories related to the degree of risk they are designed to protect against. The procedure to prove compliance with the requirements of the Directive is specific for each category and is proportional with the risk.

## CATEGORY I

Minor Risks

PPE of simple design, where the designer assumes the user can himself assess the level of protection provided against minimal risks, the effects of which are gradual and can be safely and timely identified by the users.

## CATEGORY II

Intermediate Risks

Especially injury. The glove must comply with the one or more standards and is certified by a notified body as being compliant.

## CATEGORY III

Irreversible Risks

PPE of complex design intended to protect against mortal danger or against serious and irreversible health risks, which cannot be identified in sufficient time.

## EN388

Mechanical risks-this standard applies to gloves that protect against physical and mechanical hazards; it specifies requirements for abrasion resistance, perforation resistance, tear resistance and cutting resistance.

### Glove Chemical Resistance Guide (I)

**E**=Excellent; **G**=Good; **F**=Fair; **P**=Poor; **ND**=None detected; **ID**=Insufficient Data; **D**=Degradation; **BT**=Breakthrough, amount of elapsed time after initial exposure before the chemical can be analytically detected on the inside surface of the glove; **PR**=Permeation Rate is expressed in mg/m<sup>2</sup>/sec. PR can be used for estimating glove thickness required; for a given material, thicker is more resistant.

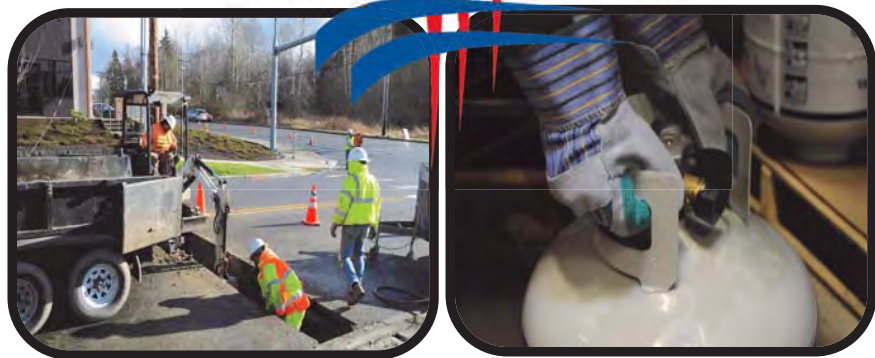

STYLE	DESCRIPTION	FEATURES	APPLICATIONS	CE CERT
<b>BPU4 (Black)</b> <b>GPU3 (Grey)</b> <b>WPU4 (White)</b>	13 Gauge nylon liner with PU coating.	Provides superior dexterity and sensitivity, breathable back for comfort.	Electronic, computer, automotive and small parts handling.	4131
<b>CRBN3</b> 	HPPE, cut resistant glove, nitrile foam coating.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	4543
<b>DYPU5</b>	Heavy weight knitted from 100% ultra high density polyethylene fiber on the palm.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, outstanding flexibility and dexterity due to the thin coating, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	4444
<b>GBNC5</b>	Light weight Taeki liner, HCT black nitrile coated on palm and knuckles.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	4543
<b>GDYP4 (Grey)</b> <b>WDP3 (White)</b>	Knitted from 100% ultra high-density polyethylene fiber and coated with polyurethane on the palm.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, outstanding flexibility and dexterity due to the thin coating, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	4344
<b>NF300 (Grey/White)</b> <b>NF500BB (Black/Black)</b>	13 Gauge nylon liner with nitrile palm coating.	Provides the highest level of grip and soaks up the oil to ensure the hand won't slip in oily conditions.	Automotive, packaging inspection, component assembly and gardening.	4121
<b>NMFD06 (Plain Palm)</b> <b>NMFD08 (Micro-Dots)</b> 	15 gauge grey nylon, black nitrile micro-foam, palm coated. Available with or without micro-dots on the palm.	Micro-Foam nitrile coatings are compatible with light oils and provide good grip and excellent abrasion resistance.	Automotive, packaging inspection, component assembly and gardening.	4131
<b>SCPU5</b>	Heavy weight steel wire with PU palm coating, extended cuff for extra protection.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, outstanding flexibility and dexterity due to the thin coating, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	3541
<b>SPARTACUS</b> 	HPPE, cut resistant knit glove, coated polyurethane palm, cut level 3.	Resistance to abrasion and cuts, excellent comfort due to the seamless liner, outstanding flexibility and dexterity due to the thin coating, machine washable to 40°C.	Automotive, glass handling, recycling, sheet metal work, cutting applications, bottling and canning, delicate and precise operations.	4342

STYLE	DESCRIPTION	FEATURES	APPLICATIONS	CE CERT
<b>DR200</b> 	Orange hi-vis impact glove, molded TPR fingers, synthetic leather, EVA foam palm, Velcro closure.	Synthetic leather palm, injection molded with Thermo Plastic Rubber (TPR), Ethylene Vinyl Acetate (EVA) padding in palm and back for impact resistance.	Construction, auto repair, demolition, manufacturing, mining fabrication, landscaping, heavy construction and applications requiring protection from impact to the hands.	3233
<b>DR500</b> 	Orange hi-vis impact glove, molded TPR fingers, synthetic leather, EVA foam palm, slip on style.	Isoliquid® breathable bonded membrane built the first layer of oil-free protection, 100% rubber composition padding provides the 2nd layer of oil permeating protection, TPR patch on fingers for impact protection and pinch injury prevention.	Oil/Gas drilling, extraction and refining, fracking, tool pushing, mining, demolition, heavy construction, cargo handling, and iron work.	3233
<b>GR2010</b> 	Green hi-vis impact glove, molded TPR fingers, synthetic leather, EVA foam palm. Velcro closure.	Synthetic leather palm, injection molded with Thermo Plastic Rubber (TPR), Ethylene Vinyl Acetate (EVA) padding in palm and back for impact resistance.	Construction, auto repair, demolition, manufacturing, mining fabrication, landscaping, heavy construction and applications requiring protection from impact to the hands.	3233
<b>GR2012</b> 	Green hi-vis impact glove, molded TPR fingers, synthetic leather, EVA foam palm, slip on style.	Synthetic leather palm, injection molded with Thermo Plastic Rubber (TPR), Ethylene Vinyl Acetate (EVA) padding in palm and back for impact resistance.	Construction, auto repair, demolition, manufacturing, mining fabrication, landscaping, heavy construction and applications requiring protection from impact to the hands.	3233
<b>GR500CORD</b> 	Green hi-vis impact glove, molded TPR fingers, corded cotton palm, EVA foam padded back.	Cotton corded palm designed for use in the oil and gas industries. Injection molded with Thermo Plastic Rubber (TPR) for back of hand protection.	Oil rigging, mechanical, mining, framing, automotive, electrical, HVAC, plumbing.	3233* *Back of Hand only
<b>TK5LP</b>	TAEKI cut resistant, cut level 5, leather palm.	Excellent cut resistance, leather patch for high mechanical & heat protection glove.	Used for material handling, glass handling operations, fishing industries, sanitation, general maintenance, woodworking, waste handling and recycling.	4542
<b>V9870BT (Band Top)</b> <b>V9870KW (Knit Wrist)</b>	Nitrile fully coated, jersey lined, safety cuff and available in a knit wrist.	Resistant to cuts, snags, punctures, abrasion, grease and oil.	Abrasive materials, automotive assembly, construction, sheet metal industries, rough castings, recycling and utilities.	4211
<b>V9875BT (Band Top)</b> <b>V9875KW (Knit Wrist)</b>	Nitrile palm coated, jersey lined, safety cuff and available in knit wrist.	Resistant to cuts, snags, punctures, abrasion, grease and oil.	Abrasive materials, automotive assembly, construction, sheet metal industries, rough castings, recycling and utilities.	4121
